

WPR.Controllers.SignUp.Sign
UpController.signUpEmployeeAsync

WPR.Controllers.SignUp.Sign
UpController.signUpPersonalAsync

WPR.Utls.PasswordChecker.
IsValidPassword

```
graph LR; A[WPR.Controllers.SignUp.SignUpController.signUpEmployeeAsync] --> C[WPR.Utls.PasswordChecker.IsValidPassword]; B[WPR.Controllers.SignUp.SignUpController.signUpPersonalAsync] --> C;
```

The diagram illustrates a dependency where two methods from the `WPR.Controllers.SignUp.SignUpController` class call a utility method `IsValidPassword` from the `WPR.Utls.PasswordChecker` class. The controller methods are `signUpEmployeeAsync` and `signUpPersonalAsync`. The utility method is `IsValidPassword`. Blue arrows indicate the direction of the calls from the controller methods to the utility method.
