

Employee.Hashing.Hash.Hash

Employee.Data.EnvConfig.
IsConfigured

Employee.Data.EnvConfig.Get

```
graph LR; A[Employee.Hashing.Hash.Hash] --> C[Employee.Data.EnvConfig.Get]; B[Employee.Data.EnvConfig.IsConfigured] --> C;
```

The diagram illustrates a dependency or data flow. On the left, there are two separate boxes. The top box contains the text 'Employee.Hashing.Hash.Hash'. The bottom box contains the text 'Employee.Data.EnvConfig.IsConfigured'. Two blue arrows originate from the right side of these two boxes and point towards a single box on the right. This box contains the text 'Employee.Data.EnvConfig.Get'. The box on the right is shaded gray, while the boxes on the left are white with black borders.
