

Employee

```
classDiagram
    class Employee {
        frontOffice
        +addIntake()
    }
    class frontOffice {
    }
    class addIntake {
    }
```

The diagram shows a class named 'Employee' with a dashed border. Inside, there is a solid-bordered box containing two elements: 'frontOffice' and 'addIntake'. 'frontOffice' is a plain text label, while 'addIntake' is enclosed in a blue-shaded box with a solid border, indicating it is a public method.

frontOffice

addIntake
