

ControllerBase

```
classDiagram
    class ControllerBase
    class HomeController["WPR.Controllers.Home.HomeController"] {
        -_connector
        -_userRepository
        +HomeController()
    }
    ControllerBase <|-- HomeController
```

The diagram illustrates a class hierarchy. At the top is the 'ControllerBase' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. At the bottom is the 'WPR.Controllers.Home.HomeController' class, represented by a shaded rectangle with three horizontal compartments. The top compartment contains the class name. The middle compartment contains two attributes: '- \_connector' and '- \_userRepository'. The bottom compartment contains a public method: '+ HomeController()'. A blue arrow with an open triangle head points from the 'WPR.Controllers.Home.HomeController' class to the 'ControllerBase' class, indicating inheritance.

WPR.Controllers.Home.Home  
Controller

- \_connector  
- \_userRepository  
+ HomeController()
