

Employee

```
classDiagram
    class Employee {
        +shared
        +acceptHireRequest()
        +viewRentalData()
    }
    class shared {
    }
    class acceptHireRequest {
    }
    class viewRentalData {
    }
```

The diagram shows a class named 'Employee' with a dashed border. Inside, there is a solid-bordered box containing three elements: a variable named 'shared', and two methods named 'acceptHireRequest' and 'viewRentalData'. The methods are highlighted with a light blue background.

shared

acceptHireRequest

viewRentalData
